

**THE GREEN REAPER**  
**Current Plant List**  
**2020**

**Note to Gardener's:** *If you are unfamiliar with a plant and want more information about its growing conditions, or are interested in what a plant looks like, I highly recommend googling the entire plant name and for pictures, searching under 'Images'. For example, for the first plant below you would want to enter **ACONITUM**(genus)+ **Arendsii**(species) in the search line. Farther down under **ALLIUM**, to find out what the cultivar 'Ozawa' looks like, you would enter **ALLIUM**+**thunbergia**+**Ozawa**. This is one of my favorite ways to look at and learn about new plants. [davesgarden.com](http://davesgarden.com), plant societies, and any state's extension service has reliable information. Feel free to get in touch if you still have questions.*

**KEY:**    \*\_New this year                      **PT SH\_Partial Shade**  
             **Su\_Full Sun**                              **D\_\_Needs well-drained soil**  
             **SH\_Shade**                                **M\_Needs moisture**

**We have Garden Rhubarb and Raspberry plants for sale as well.**

**ACONITUM (MONKSHOOD)** **SU/SH**  
  '**Arendsii**': deep blue blooms on sturdy stems, Sept-Oct, 3-5ft.  
  '**Bicolor**': purple and white bicolor,3-4ft  
  '**Sparks**': very dark purple with twining stems, Aug, 5ft.  
  **fischeri**: fall gentian blue, 28in.
